

## **TD Insurance Auto Claims Tracker**

Getting into a car accident can be stressful, and so can the claims experience.

What now? Is your car repairable? How do you get a rental car? When will your car be ready? It can feel like your claim disappeared into a black hole.

With the TD Insurance auto claims tracker, it doesn't have to feel this way.

From the moment your claim is opened to the moment it's closed, you'll know exactly what's happening.

And if your car is unrepairable, it works the same way, and lets you know when payment is issued and your claim is closed.

You'll also receive updates from your advisor through email or text, depending on what you opt in for. You'll even have their contact information at your fingertips, at all times.

Track your claim easily and securely by downloading the TD Insurance Mobile App or going online at MyInsurance and bring your claims experience into the light.

That's what confidence feels like.
